camera review ...

Canon IXUS 200 IS has a pixel density of 42.4 MP/cm². These numbers are important in terms of assessing the overall quality of a digital camera.

Generally, the bigger (and newer) the sensor, pixel pitch and photosite area, and the smaller the pixel density, the better the camera.

PowerShot SD980 has a 5x Optical zoom and an aperture of f/2.8 - f/5.9 and shift type image stabilisation as well which is all very lovely and seems to work well together. I won't go into digital zoom because I firmly believe that it should always remain switched off - hey, that's just me.
