Energy transfer in and between organisms.

Within the food chain energy can be passed and transferred from one organism to another. Whilst mammals get their energy sources from food – whether this be eating other animals or eating vegetation; plants get their energy from photosynthesis.

Assignment Energy

Transfer in living  
systems Energy is the  
capacity to do work. All  
living organisms  
require energy for  
carrying on their vital  
metabolic activities.

The primary source of  
energy for living  
system is solar  
radiation. The radiant  
energy of sunlight  
cannot be utilized
