There IS an option within Multiman to use a "PFS Driver" to switch to NTFS but there' not been any testing done on it yet. The program is not able to run games with files over 4GB from an external FAT32 drive (it will split them), so you'll have to run them from the internal drive. And no, you can't play backups from a Bluray disc.

MultiMan - Download

Formerly known as AVCHD and Game Manager, it is now being called multiMAN. The word multi is essential to this manager due to it's multifunctional tools. multiMAN does more then just backup games to your PS3. * Added: Unload network and NTFS modules loaded by webMAN on mM startup. * Fixed: Create ISO from folder.

I then got the cue file from elsewhere, checked that it referenced bin files for the music files rather than wav, and chucked it in the folder and copied the whole lot to my PSX folder on my PS3 HDD. The game does launch but instead of one disc icon in the XMB there are 12 or so (guessing one for each bin file, whether the game or music).
